

HT Series – Foot Operated Hydraulic Lift Tables

200 to 400 lb capacities

The 200 to 400 lb capacity HT series was developed specifically for use as a heavy duty utility stand or cart. Their mobility, compact size, and low weight make them portable and capable of use in confined spaces. Several sizes and options are available to suit any customer’s material handling requirements. Its rugged steel frame and rigid guide tube construction is designed to last for decades in the most demanding environments.

The HT series is engineered with ergonomics in mind. Their high capacity lift allows the operator to adjust the height of their work piece or load and unload materials between equipment or storage at different loading levels.

Suggested Applications

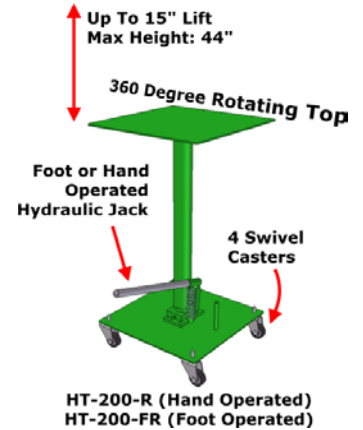

- Heavy duty, high capacity mobile utility stand/cart.
- Ergonomic adjustable workbench/workstation for multiple operators.
- Jack stand for installation of equipment.

Standard Features

- Heavy-duty steel plate construction.
- Rotating top (200 lb capacity tables)
- Rigid telescoping guide tube(s).
- Sure-grip rubber pad telescoping floor lock (not available for 200 lb capacity tables).
- Low rolling resistance, heavy duty casters.

Available Options

- UHMW tool safe soft top.
- Roller conveyor or ball transfer top.
- Handle bar (400 lb capacity tables).
- Foot operated hydraulic release lever.
